

Just a quick note to the FCC to let you know how much I have benefited from listening to XM Satellite Radio, particularly their traffic and weather channels.

I have a 60 mile commute each way, each day for work and I don't know how I would survive without it.

Satellite radio provides variety and quality that are not available elsewhere. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear.

I urge you to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Sincerley,
